BRING 'EM TO YOUR KITCHEN TABLE

School Made Simple

It is essential to seek wisdom and guidance from God and allow Him to lead you to individuals who will support your vision and heart, and pray for you during the process.

It is important to understand your reasons and define your core values and principles so that the school functions according to sound ethical standards. These foundations will be the cornerstone of the school's success.

To start a Kitchen Table School, it is necessary to research and comply with relevant federal, state, and local regulations to ensure the safety of students and the overall structure of your school.

Estimate the financial costs associated with establishing and maintaining a school, including tuition, curriculum, and any other expenses related to setting up and running the school from home.

To better meet the needs of students and families, tailor your services by deciding whom and how many you can serve. Don't try to make it overly complicated; you don't need to perfectly replicate the school environment at home.
